Pinecastle Jeep Range- Orange County, FL

Dear Mr. Fales:

Per your request, enclosed please find a copy of the MKM Report including the GPS coordinates for all of the detected Anomalies. We have also enclosed maps and other exhibits compiled for this study which were previously submitted to the Corps and reviewed by Parsons prior to their site investigation. As you know the information contained in this report was relayed to other personnel from the Corps along with the Department of Defense going back several years. I am pleased to see that the critical information that was obtained is finally being acknowledged and hopefully utilized, to once and for all initiate appropriate remedial activity on the site. Please advise if there is any other additional information we can provide.

Preliminary UXO Survey of Pinecastle Jeep Range

1.0 OBJECTIVE

A preliminary UXO survey of the former Pinecastle Jeep Range was conducted by MKM Engineers from 17 November 2003 to 10 December 2003. The purpose of the survey was to provide a preliminary risk assessment and prioritize remedial action(s) based on information obtained from field observations and the Archive Search Report (ASR) dated September 1997 prepared by the US Army Corps of Engineers (USACE), St. Louis District. Included in this assessment was a reevaluation of the RAC score for the site and/or individual tracts within the site.

Preliminary UXO Survey of Pinecastle Jeep Range

2.0 SITE DESCRIPTION

2.1 LOCATION

The former Pinecastle Jeep Range is located approximately 3 miles east-northeast of the Orlando International Airport in Orange County, Florida. Much of the area is low-lying, swamp-type wetlands. The range was in close proximity to the Orlando Army Air Base, which served as an air proving ground and tactical operations evaluation facility during World War II.

2.2 PAST USE

During 1943, the U.S. Government leased 12,483 acres of land as an off-post site of Pinecastle Army Air Field. The site was utilized by the Army Air Force Air Command as a jeep training target until 1946. According to the ASR, "The facility contained a ground-to-ground moving target, jeep track, turret range for machine guns, and rifle target ranges." In addition to being known as Pinecastle Jeep Range, "the site was also known as the Tactical Demonstration Range, the Orlando Range, Pinecastle Range, Pinecastle Bombing Range and the Pinecastle Army Air Field (AAF). Pinecastle AAF used the range as a gunnery and demonstration range. The Army Air Force Tactical Center at Orlando Army Air Base (AAB) used the site for testing and troop instruction in methods of tactical bombing and strafing." On 5 December 1947 the war department terminated the lease on the site.

2.3 PRESENT USE

The land is currently owned by local government agencies and private individuals. A site delineation map is located in Appendix A. The site is divided into four Tracts. The land is utilized for a variety of purposes, including residential, landfill and undeveloped pasture land. A multi-lane highway is constructed through the area that was most likely used for bombing activities. Additionally, an educational institution is located very close to the suspected bomb target area.

3.0 SURVEY PROCEDURES

The preliminary UXO survey was conducted according to the scope of work (SOW) dated 15 November, 2003 prepared by MKM Engineers. A site delineation map of the area is shown in Appendix A. The locations of Bombing Range Field, Culvert Crossing Field, Dove Field, and Tobacco Field are shown on the map. Possible locations of the bombing targets were inferred from air photo interpretation as presented in the ASR. Additionally, the perimeters of the .30 caliber and .50 caliber range fans were determined from the ASR.

3.1 VISUAL INSPECTION

UXO personnel conducted a limited magnetometer assisted visual inspection of Tracts 1, 2 and 3 to determine the accessibility of the site and severity of surface OE contamination. During the preliminary site walk, Tract 3 was found to be inaccessible due to thick vegetation. No visible contamination was observed on the perimeter of Tract 3.

3.2 MAGNETOMETER SURVEYS

Limited magnetometer surveys were conducted in accessible areas of Tract 1 and 2 to locate subsurface anomalies that may indicate the presence of buried ferrous metal. The magnetometer surveys consisted of schonstedt sweeps of the accessible areas within Tracts 1 and 2. Ferrous anomalies were marked in the field with pin flags.

3.3 GLOBAL POSITIONING SYSTEM (GPS) SURVEY

Surface OE items, ferrous anomalies and other areas of concern (i.e., possible bomb craters, areas of disturbed land, etc.) were marked in the field with pin flags. The coordinates of the pin flags were mapped using Real-Time Kinematic (RTK) Global Positioning System (GPS). Site maps with the anomaly coordinates superimposed are located in Appendix D.

3.4 PHOTO-DOCUMENTATION LOG

Photo-documentation was completed for surface ordnance items and other areas of concern (Appendix C).

Preliminary UXO Survey of Pinecastle Jeep Range

4.0 RESULTS

Areas covered in the UXO survey are marked on the site delineation map (Appendix A) with red, blue, or green. On the map, red is used to represent areas with a high intensity of ferrous anomalies or surface OE items. Green represents areas of low intensity, and blue is used to mark areas of intermediate intensity. Details concerning the acreage covered are summarized in Table 1.

| Tract | Total Acres | Total Surveyed Acres | Percent | High and Intermediate Intensity Acres | Low Intensity Acres |
|-------|-------------|--|---------|---------------------------------------|---------------------|
| 1 | 1567 | 270 | 17% | 118 | 152 |
| 2 | 536 | 102 | 19% | 0 | 102 |
| 3 | 2518 | Not included in magnetometer survey due to presence of thick vegetation. | | | |
| Total | 4621 | 372 | 8% | 118 | 254 |

Table 1. Pinecastle Acreage

Appendix D contains maps with the GPS coordinates of the anomalies superimposed. Map 1 displays the entire site and Map 2 shows an enlarged version of Tract 1. The GPS points are listed in Appendix D and summarized in Table 2.

| Tract | Total Points | Points per Acre |
|-------|--------------------------------------|-----------------|
| 1 | 1,253 | 4.6 |
| 2 | 32 | 0.3 |
| 3 | Not included in magnetometer survey. | |
| Total | 1,285 | 3.5 |

Table 2. Pinecastle GPS Points

4.1 TRACT 1

The highest intensity of items is located in and around the Bombing Range Field inside Tract 1. Culvert Crossing Field contains a decreasing intensity of items (from high to low) with increased distance from the Bombing Range area. A low intensity of items was detected within both Dove Field and Tobacco Field.

Surface ordnance items found in Tract 1 include:

- A 100-pound practice bomb
- A suspected 81-mm mortar
- Fuze parts
- Small arms

Additional areas of concern include:

- The area southeast of the Bombing Range containing dozens of possible bomb craters
- Disturbed ground located within the Dove Field
- A possible bomb crater located within the Dove Field

Preliminary UXO Survey of Pinecastle Jeep Range

4.2 TRACT 2

No ordnance items were observed on the surface within the accessible areas of Tract 2. Additionally, a low intensity of anomalies was detected during the magnetometer surveys of the accessible areas of Tract 2.

4.3 TRACT 3

Tract 3 was inaccessible due to thick vegetation. No visible contamination was observed on the perimeter of Tract 3.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 RISK ASSESSMENT CODE (RAC)

The RAC is used by the US Army Engineering and Support Center, Huntsville (USAESCH), Ordnance and Explosives Team (CEHNC-OE) to prioritize the remedial action(s) at Formerly Used Defense Sites (FUDS). Based on the ASR, Pinecastle Jeep Range has a score of RAC 3. RAC 3 indicates that a complete Inventory Project Report (INPR) is necessary and recommends further action by CEHNC. A more detailed description of the OE risk assessment procedure is included in Appendix B.

The RAC score was reevaluated based on field observations from the preliminary UXO survey performed by MKM Engineers (Appendix B). Based on this information, a score of RAC 1 was determined for Tract 1. RAC 1 indicates expedited INPR and recommends further action by CEHNC. The RAC for Tract 2 and Tract 3 remain unchanged with a score of RAC 3.

5.2 ENGINEERING EVALUATION/COST ASSESSMENT (EE/CA)

Based on the field observations made during the preliminary UXO survey and the reevaluation of the RAC score, the following recommendations can be made for Pinecastle Jeep Range:

- Completion of an EE/CA for Tract 1.
- Completion of an EE/CA for Tract 2. It is anticipated that only a surface clearance or construction support will be the final action recommended.
- Completion of an EE/CA for Tract 3. This may consist of an evaluation of a fraction of the area contained in Tract 3, such as a random path survey.

OE RISK ASSESSMENT:

This risk assessment procedure was developed in accordance with MIL-STD 882C and AR 385-10. The Risk Assessment Code (RAC) score will be used by the U.S. Army Engineering and Support Center, Huntsville (USAESCH), Ordnance and Explosives Team (CEHNC-OE) to prioritize the remedial action(s) at Formerly Used Defense Sites (FUDS). The risk assessment should be based on the best available information resulting from records searches, reports of Explosive Ordnance Disposal (EOD) Detachments actions, field observations, interviews, and measurements. This information is used to assess the risk involved based on the potential OE hazards identified at the site. The risk assessment is composed of two factors, hazard severity and hazard probability. Personnel involved in visits to potential OE sites should view the CEHNC-OE videotape entitled "A Life Threatening Encounter: OEW".

Part 1. Hazard Severity. Hazard severity categories are defined to provide a qualitative measure of the worst credible event resulting from personnel exposure to various types and quantities of unexploded ordnance.
